

Learning experiences that make complex work clearer and performance easier.

Adrian Yordanov

Learning Experience Design / Performance Consulting / Project Management

DIGITAL LEARNING / FACILITATION / ENABLEMENT

Selected work - public portfolio edition

Three disciplines connected by one practical approach

The portfolio combines hands-on production, performance thinking and dependable delivery across international and cross-functional work.

01

Learning Experience Design

Digital, instructor-led and blended journeys built around clear decisions, authentic practice and useful feedback.

02

Performance Consulting

Business needs, learner needs and non-training barriers stay visible before a solution is selected.

03

Project Management

Scope, review cycles, stakeholder decisions and deadlines remain clear from discovery through launch.

SELECTED WORK

- Septodont multilingual AI product training
- Worldline Scrum Master onboarding
- Acceptance and Acquiring Processing
- PCI SSF and Secure Coding
- Scaled Agile for Worldline process
- Live-chat capability rollout
- Train the Trainer programme
- Self-awareness workshop

Eight localized AI video learning experiences

A video learning suite for sales readiness, client education and international industry presentations, assembled from more than 300 scenes.

8

localized versions

300+

video scenes assembled

About 7 months

production and review

2 formats

teasers and full video

MY ROLE

Learning experience design, Synthesia production, localization coordination, stakeholder alignment and deadline management.

DESIGN RESPONSE

One validated content core became short teaser videos and one comprehensive learning asset. Septodont experts owned medical accuracy. Local language specialists reviewed each version, and I implemented their corrections across the complete production.

An eight-module onboarding journey for Scrum Masters

A self-paced Rise 360 pathway that translates a shared team vision into observable behaviours, practical action items and structured assessment.

8

learning modules

9

assessments in total

2-3 months

including review

Rise 360

complete course build

MY ROLE

End-to-end learning designer and communication lead, partnering directly with Scrum Masters through development and review.

LEARNING ARCHITECTURE

Each module unpacked one behavioural dimension through guidance, positive patterns, anti-patterns and action items. Eight module checks and one final assessment supported both onboarding and continuing development.

Leadership lesson

Interactive action items

Stakeholder guidance

Acceptance and Acquiring Processing in Storyline

A narrated technical course that explains the WLP FO context, acceptance and acquiring roles, and the flow of an online authorisation.

About 2.5 months

design and review

Every screen

human voice-over

Italy

process SME partners

Storyline

end-to-end build

MY ROLE

Instructional design, complete Storyline development, visual explanations, quiz design, and full editing and synchronisation of supplied voice-over files.

DESIGN RESPONSE

The course builds a mental model before introducing detailed process logic. Comparisons, labelled flows and hover interactions make the domain easier to navigate. Italian process specialists clarified and validated the content.

PCI SSF and Secure Coding learning with annual governance

A security and compliance course created in 2023 and maintained through the 2026 training edition for developers and related security and compliance roles.

MY ROLE

Instructional designer for the original build and annual updates, working with Technical Writers and Project Managers on content, animations and assessment.

2023

original creation

Through 2026

annual maintenance

About 1.5 months

initial development

Primary audience

developers and security roles

COURSE LIFECYCLE

The original Storyline architecture combines framework orientation, development guidance and applied knowledge checks. Each annual review incorporates approved changes while preserving the validated source-course version.

2026 training edition

Course agenda

Development overview

Applied knowledge check

A shared view of the Scaled Agile for Worldline process

A one-month Storyline build covering periodical meetings, responsibilities, artefacts and rules for people who participate in or support the SAW process.

MY ROLE

Instructional designer working with Scrum Masters, Project Managers and Technical Writers to structure and build the complete course.

About 1 month

end-to-end development

4 themes

meetings, roles, artefacts, rules

Cross-functional

Worldline stakeholders

LEARNING STRUCTURE

The experience uses a clear topic map, section-level orientation, detailed process guidance, animation and a quiz. The portfolio shows the design evidence without claiming post-launch outcomes that were not measured.

Course map

Knowledge check

A live-chat support capability across three locations

A six-month blended rollout that prepared agents and managers to add real-time chat to the support model in Sofia, Dublin and Malta.

MY ROLE

Learning designer, facilitator and project contributor connecting tool functionality, country requirements and role-specific learning.

3

Sofia, Dublin and Malta

Sofia facilitation and local delivery

05

Sustain

New-agent onboarding

Stakeholders reported strong satisfaction and operational results. Verified response-time, handling-time and CSAT figures are no longer available, so no numerical outcomes are assigned.

Preparing support agents to train and onboard peers

A multi-day internal programme for support agents with an affinity for training, followed by workplace application and a one-month development check-in.

3

co-facilitated cohorts

About 30

participants

Multi-day

instructor-led format

1 month

follow-up

MY ROLE

Lead co-facilitator across approximately three cohorts, with collaborative input into facilitator deck and workbook improvements.

Module 2

Training Need Analysis

What to analyse?

- Where does the training request come from
- The root cause behind the symptom
- How many people are impacted
- What's the impact for your department
- Measuring Success

Facilitator deck: training needs analysis

Workbook: defining the performance problem

QUALITATIVE SIGNAL

Participants, their managers and the programme's training leadership consistently shared positive feedback.

A safe space for reflection across organisational levels

A custom two-hour workshop combining self-reflection, guided sharing and practical development planning for a cross-level audience.

MY ROLE

Research and content curation, custom workshop design, and online and in-person facilitation for distributed teams.

2 hours

focused workshop

Cross-level

CEO to frontline agents

Hybrid

primarily online

2 contexts

adapted across organisations

WORKSHOP ARC

Low-risk opening prompts led into Johari Window and Heart Map activities, guided perspective sharing and personal action planning. Participants valued the safety, self-discovery and stronger human connections.

Reflective visual identity
